TRUCK CABS

Now you can have the luxury of wood grain styling in your truck cab. This Prestige Woodline selection is made by the market leading supplier in Germany.

We carry stocks of Warm Brown Walnut finish to suit a number of commercial vehicle dashboards as shown here. See pages 6-10 for vans, minibuses and light commercial kits.

Other colours and finishes are available to special order such as Aluminium, Carbon Fibre Texture, and attractive wood ranges: Rosewood, Dark Walnut, Honey Walnut and Maple.

PREMIUM LUXURY QUALITY

There are now a number of inferior dashboard kits on the market. At Parma, we only supply kits that we are confident have been manufactured to a high standard.

These kits use a 2.5mm thick material providing a 3D look with a highly polished appearance, adding real class to your cab.

The material has a soft flexible feel, is easy to work with and apply, but is also unbreakable, scratch and splinter-proof.

DAF LF 2001 on

Dashboard kits are tested and approved to German TÜV standards.

BUS AND COACH

A luxury walnut dash decor kit enhances the drab appearance of a manufacturer's basic dashboard.

An ideal accessory for convertors building on small and medium chassis, dash kits are easily applied and are available from stock to fit most popular vehicles. See listing on page 9 and also our Price List.

BEST VALUE

Some dash kits include matching door trim.

BEST QUALITY

SPECIAL DESIGNS

Parma can also offer bespoke designs to suit non-standard minibus options and also for full size coaches.

Contact our Sales Office for more details.

ALTERNATIVE FINISHES

Walnut woodgrain has always been the most popular finish for dashboard decor. However, a number of manufacturers and operators are selecting alternatives for a fresher, more modern look.

Normally available to special order, taking about 20 working days, other options can be supplied such as those illustrated on this page.

Aluminium, Carbon Fibre Texture and **Graphite** are now becoming popular as well as the recently added wood ranges: Rosewood, Dark Walnut, Honey Walnut, Black Walnut and Maple.

For bus manufacturers and converters, we can arrange to hold stocks of these special finishes for quick delivery. Please contact our Sales Office.

See next page and also our Price List for details of standard kits available.

Different finishes change the appearance of the dashboard. LDV Maxus with traditional walnut.

Identical kit to the one shown above but with modern carbon fibre finish.

Brushed aluminium option gives a brighter appearance to the same LDV dashboard.

Graphite finish enlivens the full width of the dashboard on this Mercedes Vario luxury minibus.

STEERING WHEEL COVERS

To complement your dashboard, why not fit one of these attractive steering wheel covers?

Available for 14" steering wheels in a choice of walnut or brushed aluminium finish to match these dashboard colours.

PWC-010 Walnut
PWC-020 Aluminium

Dashboard Decor

LIGHT COMMERCIALS

Our selection of dashboard kits includes many for light and medium vans and chassis cabs.

Adding a touch of luxury to a mundane grey dashboard improves the vehicle immeasurably. Minibuses, white vans (and other colours!), horseboxes, people carriers and in fact any light commercial will greatly benefit from the warm comfort of a walnut dashboard or one of our alternative modern finishes.

PPW-251 Volkswagen T5

Dash kits supplied as easy-peel sections and with cleaning cloth and instructions.

Mercedes Vito 2003 on. Different variants available.

PPW-224 Mercedes Sprinter

MOTORHOMES

The range includes kits for popular motorhome base vehicles and the fitment of a luxury dash greatly enhances these high quality conversions.

Parma woodgrain dashboard kits vastly improve the vehicle and especially the driver's environment. Although sometimes fitted by the converter or motorhome dealer, they also lend themselves to DIY fitment by the owner.

The resulting effect is satisfying and long lasting.

Smaller kit **PPW-291** covers main dashboard only.

Extra kit **PPW-292** comprises a pair of door pieces.

PPW-249 Volkswagen T4 1998-04

We normally stock these dashboards in medium walnut in right hand drive. Other colours and special finishes are available to special order such as Aluminium and Carbon Fibre Texture.

LEFT HAND DRIVE?

Some left hand drive kits stocked, others to order. Please confirm when placing your order.

IMPORTANT

Please help us supply the right kit for your vehicle. Check carefully the date of manufacture and model number when ordering. This is especially important for motorhomes when the build date of the base chassis is required. If in doubt, ask for a shadow sheet first to check details.

Dashboard Decor

FITTING

Adding a quality finish to your dashboard simply requires some spare time, a hairdrier or hot air gun and a clean cloth.

Full instructions are supplied with every kit.

The pictures on this page may help to illustrate the procedure. The vehicle in this instance is a 2004 Volkswagen T5.

After carefully cleaning the dashboard surface, identify each part and confirm its position on the dash or elsewhere in the vehicle interior.

The individual pieces are fixed one at a time by firm hand pressure and the use of gentle heat to help cure the adhesive. A hairdrier or hot air gun on medium setting is ideal for this.

Please note that some kits have alternative pieces which suit different cab variants.

The finished result greatly enhances the vehicle both visibly and to the touch.
